POOL DISCLAIMER/ASSUMPTION OF RISK –

POOL/SPA There is a daily charge \$35 for pool and spa heat. Recommend (Oct- Mar) only.

NOTE. Additional Pool heating can be requested at time of booking or direct with owners on a day by day basis upon arrival. Please understand that it is not possible to guarantee the temperature of the pool which to some degree is dependent on the local weather. Gas heat pumps are more efficient at heating the water of pools and spas in all temperature ranges. Typically, a swimming pool at a Vacation home in Florida that is heated by a gas heat pump will heat to the operating temperature (75-85 degrees Fahrenheit) within 1 day. Spa pools will warm to their operating temperature within 15 minutes. Guests should note that on vacation homes offered with gas heated pools, the pool heat charge is higher than on electrically heated units as the fuel costs are higher.

Electrically heated pumps will warm a pool on a Florida pool home to the operating temperature of 75-85 degrees Fahrenheit in 24-48 hours - depending upon the ambient air temperature. Please note that electrical pool heaters utilize a heat exchange pump. If the outside temperature at your vacation home drops below 55 degrees Fahrenheit, then the pool heater will not operate, and the pool will not be heated. If the overnight temperature drops below 50, the pool may not be able to return to the operating temperature range during the following day. If the temperature drops to 50 degrees or less, this temperature cannot be guaranteed as the pool heaters will not be very effective. In this event, NO refund will be given to the guests. A display showing the daily temperature high and low is available at the Villa office for guests during pool heat season.

Guests should also note that spa pools provided on vacation homes with electric heat pumps are not hot-tubs, and are not always designed to heat higher than the temperature of the pool. If a guest specifically wishes to have a hot-tub, then they should select a vacation home from our range that has a gas heater and spa pool.

All Villa should note that pool heat cannot be guaranteed, as sometimes mechanical devices fail, or environmental factors will not allow the pools to be heated. Guests must notify the company of failure of pool heat on the day, so that the temperature or the equipment can be checked by

personnel. In the event that pool heat purchased by the guest fails to heat the pool to the specified temperature range between 75-85 degrees Fahrenheit, Villa will refund the pool heat for the days it is not provided on request. Guests who book their vacation rental through the owner will need to contact the owner for clarification of the owner's policy on pool heating. Due to Florida laws statute 515.29 the pool fencing safety area can not be removed at any time due to State of Florida Laws if it is removed the security deposit will be revoke due to Fines be the state.

http://www.poolsafetyfences.com/pool_rules.html. *NOTE: All pool homes have Pool Door Alarms and/or Child Safety Fences. According to Chapter 515.33 of the Residential Swimming Pool Safety Act: Anyone tampering with or disconnecting pool alarms commits a misdemeanor of the second degree, punishable by a \$5000 fine or one (1) year in jail.*

POOL OPERATION AND HEATING --

Guests are not permitted to interfere with the workings of the pool nor are they allowed to change any settings that control the pool heat. The pool heat is set at a temperature that is suitable for the Floridian climate. If guests have concerns regarding the pool or the temperature they must contact the Management Company to address these concerns. Random inspections of the pool controls will be made by the Management Company, if there is any evidence found that these have been tampered with, this will warrant the complete with holding of the guests security deposit
